EROSION CONTROL GENERAL NOTES

1. ***STABILIZED CONSTRUCTION***
   - Stabilized construction at site is subject to erosion control in accordance with the requirements of the construction plan.
   - Erosion control measures shall be installed prior to disturbance of the soil surface.

2. ***CONCRETE WASHOUT***
   - Concrete washouts shall be installed where necessary to divert water from sensitive areas.
   - Washouts shall be designed to handle the maximum anticipated flow rate.

3. ***FIBER ROLLS***
   - Fiber rolls shall be used to cover disturbed areas and contour lines.
   - Rolls shall be placed in a single layer and不得超过 one inch thick.

4. ***DROP INLET SEDIMENT PROTECTION***
   - Drop inlet sediment protection shall be installed at all drop inlets.
   - Protection shall be designed to prevent erosion and sedimentation in the area.

5. ***EROSION CONTROL LEGEND***
   - Legend shall be provided on the plan to indicate the erosion control measures installed.
   - Symbols shall be used to represent various erosion control features.

6. ***EROSION CONTROL DETAILS***
   - Details shall be provided for each erosion control measure installed.
   - Details shall include dimensions, materials, and installation procedures.

7. ***EROSION CONTROL GENERAL***
   - General notes shall be provided to explain the purpose and application of the erosion control measures.
   - Notes shall include best management practices and guidelines for implementation.

8. ***EROSION CONTROL SPECIFICATIONS***
   - Specifications shall be provided for each erosion control measure.
   - Specifications shall include material requirements, quality control, and testing procedures.

9. ***EROSION CONTROL INSPECTION***
   - Inspection shall be conducted to ensure compliance with the erosion control plan.
   - Inspection shall be performed by qualified personnel.

10. ***EROSION CONTROL COMPLIANCE***
    - Compliance with the erosion control plan shall be verified.
    - Verification shall be conducted by the project manager or representative.

11. ***EROSION CONTROL RECORDS***
    - Records shall be maintained for all erosion control measures installed.
    - Records shall include installation dates, materials used, and inspection reports.

12. ***EROSION CONTROL REPORT***
    - A report shall be submitted to the project manager upon completion of the erosion control measures.
    - Report shall include a summary of installation details, compliance verification, and any deviations from the plan.

13. ***EROSION CONTROL TRAINING***
    - Training shall be provided to all personnel involved in the erosion control measures.
    - Training shall cover the installation procedures and best management practices.

14. ***EROSION CONTROL MAINTENANCE***
    - Maintenance shall be performed as necessary to ensure the effectiveness of the erosion control measures.
    - Maintenance shall include regular inspections and repairs as needed.

15. ***EROSION CONTROL PERMITS***
    - Permits shall be obtained as required by local regulations.
    - Permits shall be obtained prior to the start of the construction project.

16. ***EROSION CONTROL COMPLIANCE CERTIFICATE***
    - A compliance certificate shall be issued upon completion of the erosion control measures.
    - Certificate shall be signed by the project manager and verified by the local regulatory agency.

17. ***EROSION CONTROL DOCUMENTATION***
    - Documentation shall be kept on file for future reference.
    - Documentation shall include all related plans, specifications, and records.

18. ***EROSION CONTROL CONSTRUCTION***
    - Construction shall be performed in accordance with the erosion control plan.
    - Construction shall include the installation of erosion control measures as required.

19. ***EROSION CONTROL MATERIALS***
    - Materials shall be selected based on their suitability for the project.
    - Materials shall be tested and approved by the project manager.

20. ***EROSION CONTROL COSTS***
    - Costs associated with erosion control measures shall be included in the project budget.
    - Costs shall be reviewed and approved by the project manager.

21. ***EROSION CONTROL QUALITY CONTROL***
    - Quality control shall be performed to ensure the effectiveness of the erosion control measures.
    - Quality control shall be conducted by a certified quality control technician.

22. ***EROSION CONTROL COMPLIANCE ASSURANCE***
    - Compliance assurance shall be conducted to ensure the effectiveness of the erosion control measures.
    - Compliance assurance shall be performed by an independent third party.

23. ***EROSION CONTROL INSURANCE***
    - Insurance shall be obtained to cover any potential damages resulting from erosion control measures.
    - Insurance shall be obtained prior to the start of the construction project.

24. ***EROSION CONTROL LEGAL REQUIREMENTS***
    - Legal requirements shall be met for all erosion control measures.
    - Legal requirements shall be verified by a legal expert.

25. ***EROSION CONTROL CONTRACTUAL DOCUMENTS***
    - Contractual documents shall include provisions for erosion control measures.
    - Contractual documents shall be reviewed and approved by the project manager.

26. ***EROSION CONTROL OPERATIONS AND MAINTENANCE***
    - Operations and maintenance shall be performed to ensure the effectiveness of the erosion control measures.
    - Operations and maintenance shall be conducted by a qualified operations and maintenance team.

27. ***EROSION CONTROL TRAINING AND INSTRUCTION***
    - Training and instruction shall be provided to personnel involved in erosion control measures.
    - Training and instruction shall cover the installation procedures and best management practices.

28. ***EROSION CONTROL INSPECTION AND TESTING***
    - Inspection and testing shall be performed to ensure the effectiveness of the erosion control measures.
    - Inspection and testing shall be conducted by a certified inspection and testing professional.

29. ***EROSION CONTROL RECORDS AND DOCUMENTATION***
    - Records and documentation shall be maintained for future reference.
    - Records and documentation shall include all related plans, specifications, and reports.

30. ***EROSION CONTROL COMPLIANCE ASSURANCE AND INSPECTION***
    - Compliance assurance and inspection shall be conducted to ensure the effectiveness of the erosion control measures.
    - Compliance assurance and inspection shall be performed by an independent third party.
IN THE AREA OF DEDUCTIVE ALTERNATIVE 1, DEDUCT THE FOLLOWING:

- All utility easements associated with the new parking facility.
- All utility easements associated with the new parking facility.
- All utility easements associated with the new parking facility.
- All utility easements associated with the new parking facility.
- All utility easements associated with the new parking facility.
- All utility easements associated with the new parking facility.

IN THE AREA OF DEDUCTIVE ALTERNATIVE 1, REPLACE THE DEDUCTED ITEMS WITH THE FOLLOWING:

- Replace the deducted items with the following:
- Replace the deducted items with the following:
- Replace the deducted items with the following:
- Replace the deducted items with the following:
- Replace the deducted items with the following:
- Replace the deducted items with the following:

THE SCOPE IN C9.0 UTILITIES PLAN WILL REMAIN AS DESIGNED AND IS NOT PART OF THE "DEDUCTIVE ALTERNATE 1".
Approval of this plan does not authorize or approve any omission or deviation from applicable regulations. Final approval is subject to field inspection. One set of approved plans shall be available on the project at all times.
