Interior Room Identification Signs:

a. All interior signs shall be manufactured using a ¼” Photopolymer Process. All exterior signs shall be manufactured using a ¼” exterior Photopolymer Process.
b. Tactile characters shall be raised the required 1/32" inches from sign face. Glue-on letters or etched backgrounds are not acceptable.
c. All text shall be accompanied by Grade 2 Braille. Braille shall be separated ½” from the corresponding raised characters or symbols. Grade 2 Braille translation to be provided by signage manufacturer.
d. All letters, numbers and/or symbols shall contrast with their background, either light characters on a dark background or dark characters on a light background. Characters and background shall have a non-glare finish.
e. In the cases when Braille is not specified in the written specification, use ¼” acrylic using subsurface vinyl graphics and paint.
f. Background Color: Dark Rhein Silver. All sides of the background must consist of the same color as selected.
g. Graphic Color: Benjamin/Moore-Branchport Brown.
h. Letterform shall be: Universe 57 Condense.
i. Signage Installation and Locations: Signs shall be mounted using double sided vinyl tape and silicone adhesive. Mounting shall be weather proof in exterior applications. All signs shall be mounted 60” from the floor to the center of the sign on the latch side. The distance between the doorframe and sign shall be 2”. Installer assumes responsibility for suitable installation of the signs. Signs shall be level within one quarter of degree. Locations to be verified by University’s Representative before installation.
j. Signage mounted on glass shall have backers matching “Dark Rhein Silver” background color.
